Michael,

CBI/Ex. 4	A new Gold King viewer is being deployed specific the Emergency Response, so TERA won't be your best source of ER-specific data after today.

Joyel I was going to use Terra to follow its potential impacts but the internal or external version won't let me in with '**mmckinle**'. Can I get a new password?

All,

The new version of TERA has been deployed. This new version is built using JavaScript, making it available on mobile devices as well as your desktop computers. All the same data and functionality have been retained, it just looks and feels slightly different.

If you work for a governmental organization, you now have access to the internal version. If you do not work for a governmental organization, then you only have access the external version. If you are not able to access the version you feel is appropriate for you, please let me know.
